- **Technologies & Tools:** Git, GitHub, VS Code, Vercel, IntelliJ IDEA, Render, Postman

PROJECTS

RISESTOCK | [link](#)

(Currently Developing | 2026-Present)

- Developing a modern full-stack stock trading platform using React.js, Node.js, Express.js, and MongoDB.
- Designed a unique and responsive user interface with BootStrap, focused on an intuitive and seamless trading experience.
- Building RESTful APIs for user management, portfolios, watchlists, holdings, and order history.
- Implementing secure user authentication and authorization using JWT.
- Developing key trading features including Dashboard, Buy/Sell Orders, Portfolio Management, Watchlist, Holdings, and Transaction History.

Interactive Agency Website Clone (Inspired by K72) | [link](#)

June 2026

- Developed a pixel-perfect agency website clone with modern UI/UX and advanced scroll-based animations.
- Implemented GSAP ScrollTrigger for image pinning, smooth scrolling effects, image-sequence transitions, and text animations.
- Built reusable React components and responsive layouts using Tailwind CSS.
- Optimized animation performance for a smooth user experience across devices.

UXNEST | [link](#)

Jan 2025

- Developed an online code editor supporting HTML, CSS, and JavaScript with live preview functionality.
- Built an interactive front-end compiler that instantly renders user code output.
- Designed a responsive user interface to improve usability and developer experience.
- Implemented state management and real-time code updates using React.js.
